

ASSIGNMENT 06

In module 06, you learn about Views. This assignment reinforces your knowledge as you perform the following steps:

1. Watch the course videos
2. Read web articles and perform their examples.
3. Watch some web videos
4. Create Views in a database.
5. Submit your work to the Canvas site.

This activity will take you about 6 to 8 hours, so plan accordingly!

Watch the course Videos

Please watch the following Videos:

1. Module 06 Instructor's Zoom session (See Canvas)
2. [Module 06 Playlist](#)

Read Web articles

Please read the following web articles.

1 - W3Schools.com's SQL Tutorial

- [SQL Views](#)

Create Views in a Database

Open the Assignment06.sql File, locate the Question and Answers section at the bottom of the file, and create SQL code that will answer the questions. (Full points are only given if your code is well-formatted, consistent, and produces the same result!)

Notes:

- Make sure to use the **base views** for questions 3 through 10.
- Use the following **images to validate** your results.
- Make sure to **show you intermediate work** steps leading up to answering the questions as shown in the assignment video.
- Use in the **Order By clause** to make sure the data is sorted correctly!
- Make sure to **use the names I provide** at the bottom of the script!

	CategoryName	ProductName	UnitPrice
1	Beverages	Chai	18.00
2	Beverages	Chang	19.00
3	Beverages	Chartreuse verte	18.00
4	Beverages	Côte de Blaye	263.50
5	Beverages	Guaraná Fantástica	4.50
6	Beverages	Ilooh Coffee	46.00

Figure 1: The results of question 3 (partial results)

Question 4

	ProductName	InventoryDate	Count
1	Alice Mutton	2017-01-01	0
2	Alice Mutton	2017-02-01	10
3	Alice Mutton	2017-03-01	20
4	Aniseed Syrup	2017-01-01	13
5	Aniseed Syrup	2017-02-01	23
6	Aniseed Syrup	2017-03-01	33
7	Boston Crab Meat	2017-01-01	123

Figure 2: The results of question 4 (partial results)

Question 5

	InventoryDate	EmployeeName
1	2017-01-01	Steven Buchanan
2	2017-02-01	Robert King
3	2017-03-01	Anne Dodsworth

Figure 3: The results of question 5 (all results)

Question 6

	CategoryName	ProductName	InventoryDate	Count
1	Beverages	Chai	2017-01-01	39
2	Beverages	Chai	2017-02-01	49
3	Beverages	Chai	2017-03-01	59
4	Beverages	Chang	2017-01-01	17
5	Beverages	Chang	2017-02-01	27
6	Beverages	Chang	2017-03-01	37
7	Beverages	Chartreuse verte	2017-01-01	69
8	Beverages	Chartreuse verte	2017-02-01	79

Figure 4: The results of question 6 (partial results)

	CategoryName	ProductName	InventoryDate	Count	EmployeeName
1	Beverages	Chai	2017-01-01	39	Steven Buchanan
2	Beverages	Chang	2017-01-01	17	Steven Buchanan
3	Beverages	Chartreuse verte	2017-01-01	69	Steven Buchanan
4	Beverages	Côte de Blaye	2017-01-01	17	Steven Buchanan
5	Beverages	Guinness Extra Stout	2017-01-01	20	Steven Buchanan

Figure 5: The results of question 7 (partial results)

	CategoryName	ProductName	InventoryDate	Count	EmployeeName
1	Beverages	Chai	2017-01-01	39	Steven Buchanan
2	Beverages	Chang	2017-01-01	17	Steven Buchanan
3	Beverages	Chai	2017-02-01	49	Robert King
4	Beverages	Chang	2017-02-01	27	Robert King
5	Beverages	Chai	2017-03-01	59	Anne Dodsworth
6	Beverages	Chang	2017-03-01	37	Anne Dodsworth

Figure 6: The results of question 8 (partial results)

	Manager	Employee
1	Andrew Fuller	Andrew Fuller
2	Andrew Fuller	Janet Leverling
3	Andrew Fuller	Laura Callahan
4	Andrew Fuller	Margaret Peacock
5	Andrew Fuller	Nancy Davolio
6	Andrew Fuller	Steven Buchanan
7	Steven Buchanan	Anne Dodsworth
8	Steven Buchanan	Michael Suyama
9	Steven Buchanan	Robert King

Figure 7: The results of question 9 (all results)

Question 10

	CategoryID	CategoryName	ProductID	ProductName	UnitPrice	InventoryID	InventoryDate	Count	EmployeeID	Employee	Manager
1	1	Beverages	1	Chai	18.00	1	2017-01-01	39	5	Steven Buchanan	Andrew Fuller
2	1	Beverages	1	Chai	18.00	78	2017-02-01	49	7	Robert King	Steven Buchanan
3	1	Beverages	1	Chai	18.00	155	2017-03-01	59	9	Anne Dodsworth	Steven Buchanan
4	1	Beverages	2	Chang	19.00	2	2017-01-01	17	5	Steven Buchanan	Andrew Fuller
5	1	Beverages	2	Chang	19.00	79	2017-02-01	27	7	Robert King	Steven Buchanan
6	1	Beverages	2	Chang	19.00	156	2017-03-01	37	9	Anne Dodsworth	Steven Buchanan
7	1	Beverages	24	Guaraná Fantástica	4.50	24	2017-01-01	20	5	Steven Buchanan	Andrew Fuller
8	1	Beverages	24	Guaraná Fantástica	4.50	101	2017-02-01	30	7	Robert King	Steven Buchanan

Figure 8: The results of question 10 (partial results)

Assignment Document

Write a one-page document that articulates the answer to the following questions. Use at least one well-formed paragraph per question. Using only a sentence or two is fine, but it must make sense and be well-formed. (Please use MS Word or a compatible word processor)

1. **Explain when you would use a SQL View.**
2. **Explain the differences and similarities between a View, Function, and Stored Procedure.**

Important: Your document must look professional to get full points! Use my example template and video, in the General Files and Topics module, as a guide for what I expect a professional paper to look like. Make sure you format it like a college paper instead of the text message. Things like your name, date, class, citations, introductory and summary paragraphs are always expected! Not putting these in the document you will cost you!

Step 7 - Post your Files to GitHub

In this module, you need to **post** your files on a public **GitHub repository** so that others may review it. Please post **both** your Word document and your SQL file.

Here are some videos to help you **learn** what GitHub is and how to use it.

- Introduction - Git and GitHub: <https://youtu.be/BCQHnlnPusY>
- How to use GitHub for Beginners: <https://youtu.be/E8TXME3bzNs>
- Setting up a GitHub Account: https://youtu.be/Sk1_DU2ky48

Once you understand how it works, perform the following to **create** a repository for your code:

a. **Login** to <https://github.com> (Make a new account if needed!)

Important: GitHub requires an email account for your login. You may use a new made-up email account with a made-up name if you are concerned about security. If you need more safeguards than that, please talk to your instructor.

b. **Create** a repository called "**DBFoundations**" under your account. Figure 1 shows the steps.

Create a new repository

A repository contains all project files, including the revision history. Already have a project repository elsewhere? [Import a repository.](#)

Owner *

Repository name *

 rootrUW

/

DBFoundations

1

Great repository names are short and memorable. Need inspiration? How about musical-disco?

Description (optional)

☒

Public

2

Anyone on the internet can see this repository. You choose who can commit.

☐

Private

You choose who can see and commit to this repository.

Skip this step if you're importing an existing repository.

☒ Initialize this repository with a README

3

This will let you immediately clone the repository to your computer.

Add .gitignore: None

Add a license: None

4

Create repository

Figure 9. Creating a GitHub repository

c. Upload both of your SQL and Word files to the repository.

Figure 10. Uploading to a GitHub repository

d. Commit the changes to save your work.

Figure 11. Committing the changes in a GitHub repository

Step 8 - Post a Link to GitHub

You will share your work using the Canvas discussion board called **Module06 GitHub Links**. To do so, you must create a post with a link to your GitHub site. Other students will use this link to perform a peer review.

Figure 12. Posting a link to your GitHub repository

Important: Post only on the special discussion board called "Module06 GitHub Links"

Submit your work

Even though you have posted your file on GitHub, **you still need to submit them as a Canvas assignment** for grading. So, place your document and SQL script in the Assignment06 folder. Zip this folder into a ".zip" file, then upload the .zip file to the class assignment page.

Important:

1. **Upload your work to the Canvas assignment's as a Zip file.**
2. **Post a link to your GitHub site on the assignment textbox.**

Perform a Peer Review (Not Graded!)

After you have posted your link to GitHub and submitted your assignment, go to the "Module07 GitHub Links" discussion board and **select another student's post and review**. Follow the link they posted and review their files on GitHub. **This is an informal review that does not affect either your or their grade. Try to pick someone's link that has NOT been reviewed yet, even if you have to wait a few days for one to appear!**

NOTES:

- **Post** your comments as a reply to their posting so the review will be nested under the other student's posting.
- **Make sure** to say **two things that you liked** about their work
- **Make sure** to say **one thing that could make the work better**

Figure. Doing a peer review

You are done!
